3-5 kW solar energy price

Overview

On average, a 3.5 kW solar panel system costs \$10,010, according to real-world quotes on the EnergySage Marketplace from 2025 data. However, your price may differ—solar costs can vary significantly from state to state. How much does a 3.5 kW solar panel cost?

On average, a 3.5 kW solar panel system costs \$9,625, according to real-world quotes on the EnergySage Marketplace from the first half of 2024. However, your price may differ; solar costs can vary significantly from state to state. The table below should give you an idea of what you can expect to pay for a 3.5 kW solar panel system in your state.

How much does a 3KW Solar System cost?

A 3 kW system will cost about \$6,300 to install, including the federal solar tax credit, and will pay for itself in just under 11 years. 3kW systems help offset electricity usage and will not eliminate your entire electricity bill. A 3kW solar system will produce between 260-415 kWhs of electricity depending on sun exposure.

How much electricity does a 3.5 kW solar system produce?

A 3.5 kW solar panel system produces about 5,082 kWh of electricity annually, but the exact amount depends on where you live and how much sun you get. DIYing a 3.5 kW solar panel system usually isn't your best bet: You're much better off hiring a professional solar company for optimal results. How much does a 3.5 kW solar system cost?

.

How much does solar power cost in 2025?

Take control of your energy costs with solar power. Solar panels generate “free” electricity, but installing a system still costs money. A typical American household needs a 10-kilowatt (kW) system to adequately power their home, which costs \$28,241 in 2025.

How many solar panels are in a 3KW system?

3kW systems are small and usually have between 8 and 11 solar panels. The actual number of solar panels within a 3kW system depends on the wattage of the solar panels. Higher wattage panels are more efficient than their lower-wattage counterparts. Typical panels have wattages of between 275-400 watts.

How much does a solar system cost per watt?

As of publishing, the average cost per watt is \$2.84. Most solar companies set the price according to the solar system's wattage. A solar installation's "cost per watt" is a little like the "price per square foot" when you buy a house. It helps compare the value of solar energy systems in different sizes.
