

### **SolarInvert Energy Solutions**

# Albania s largest energy storage exporter

#### **Overview**

Almost 60% of the Albanian total energy supply is met through fossil fuels, mostly by oil. The share of modern renewables in final energy consumption in Albania is 42%. In terms of electricity generation.

How is energy used in Albania?

Total energy supply (TES) includes all the energy produced in or imported to a country, minus that which is exported or stored. It represents all the energy required to supply end users in the country.

Why does Albania need to import energy?

Changing weather patterns over the years have forced the country to import energy to cover domestic needs, as a lack of storage capacity requires Albania to sell its generated power during peak months of production.

Is Albania a net energy importer?

Today, Albania remains a net energy importer as domestic energy production is not able to meet demand. When it comes to renewable energy imports, Eurostat data shows that the country ranks 8 th in Europe.

What is the situation in the development of the energy sector in Albania?

The situation in the development of the energy sector in Albania 2.1. Electricity production for 2023 8,796 GWh of electricity, almost 11% more than the energy consumption. increase in production by 25.6% compared to 2022, where it was 7,003 GWh.

Does Albania have a national strategy of energy?

Albania's Ministry of Energy recently launched an auction round for the construction of the country's first large-scale solar plant. The country also has a National Strategy of Energy, which aims to develop an effective energy sector that guarantees secur.

Is Albania a good place to invest in renewables?

Opportunities for renewables, and especially for solar and wind energy, are extensive in Albania. According to IRENA's Renewables Readiness Assessment report (2021), the solar radiation is very high throughout most of its territory, with the country enjoying some of Europe's highest number of sunshine hours per year.
