

SolarInvert Energy Solutions

Austria s 10MW flow battery

Overview

What is the world's first organic solidflow battery?

The world's first operational Organic SolidFlow battery has been successfully delivered on 13.07.2023 to one of the biggest PV parks in Austria for Burgenland Energie .

What is organic flow battery?

The “Organic-SolidFlow” battery connected to the solar park is initially located as a “battery lab” in a 40-foot, air-conditioned and location-independent container. The other batteries will then be installed at different locations. CMBlu was among the winners of the 2018 pv magazine Annual Award for its organic flow battery tech.

What is a flow battery system?

The flow battery system has a multi-cell stack design and is only really suitable for stationary storage applications, but it is easily scalable to the gigawatt level. The project is located in Schattendorf, Burgenland, eastern Austria, and is connected to a hybrid photovoltaic wind power plant.

Are solidflow batteries flammable?

SolidFlow batteries store electrical energy in electrolytes with almost unlimited availability, are free of critical raw materials and safe to operate without flammability. About CMBlu Energy CMBlu Energy is a leading designer and manufacturer of safe and sustainable long-duration industrial battery storage systems.
