Battery Replacement BMS

Overview

What is a BMS in an e-bike battery?

The main role of the BMS in an e-bike's battery is to make sure all the cells of the battery are in balance during charging and discharging. "Cells" of a battery pack are actually cell blocks, made up of multiple 18650 cells in parallel (to give additional current capacity). Each cell is thus the voltage of one battery, which is around 3.6V.

Do You need A BMS to charge a battery?

A BMS is a delicate issue. There are actually people who believe in charging batteries without a BMS, like this guy on YouTube: He makes a lot of good points. Essentially, if you have a charger that can balance all the cells, you don't need to use a BMS for that purpose. Firstly what does a BMS do?

.

How do you test a BMS on an e-bike battery?

One trick for testing voltage across the pins of the BMS is that they're often coated with silicon. You should scrape it away gently before checking the voltage. How Does the BMS of an e-Bike Battery Fail?

A BMS is a delicate issue. There are actually people who believe in charging batteries without a BMS, like this guy on YouTube:.

What is the most important part of a BMS?

The most important part of a BMS is the size of the battery pack it's rated for. You might know you have one of the following battery pack sizes: 24V, 36V, 48V, or 52V. These are the most common battery pack sizes (36V seems to be the most common out of all of them). The size of the battery pack dictates how many cells you have in the battery.

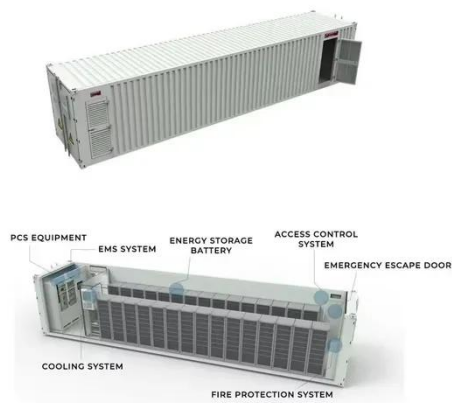

How long does it take to rebalance a BMS battery pack?

Our team removed the weak cells, installed compatible replacements, reprogrammed the BMS firmware, and rebalanced each pack. Within one week, all battery packs were restored to full functionality.

Can a new BMS be soldered to a B0 battery?

Note: If your new BMS has a B0 wire and the previous one had none you will have to solder it to the B0 battery nickel strip, there is no work around on that.

Battery Replacement BMS

How we test and replace a BMS on a battery.

Take you current pack and look on the BMS to locate the B14 (or else) test with a multimeter between the battery common ground (B-) and the B14 to see if you have the full ...
