

SolarInvert Energy Solutions

Belgian independent energy storage project

Overview

What is the largest energy storage project in Europe?

A first flagship energy storage project in Belgium After commissioning four battery parks in France offering total energy storage capacity of 130 MWh, this project will be the Company's largest battery installation in Europe.

How can Giga storage help facilitate the nuclear phase-out in Belgium?

Our ambition is to help facilitate the nuclear phase-out by achieving 2025 GW of battery storage in Belgium before 2030. GIGA Storage specializes in large-scale energy storage, investing in projects for optimizing energy supply and ensuring grid stability.

What is the D-Stor battery storage project in Belgium?

A digital illustration of the D-STOR battery storage project in Belgium. Image: BSTOR. Project owners BSTOR and Energy Solutions Group have started building separate BESS projects totalling 440MWh of capacity in Belgium, following financial close, both of which will use Tesla Megapacks.

What does the Visé project mean for Belgium's energy infrastructure?

The Visé project is scheduled to play a vital role in Belgium's energy infrastructure once operational. It reflects increasing interest in battery storage across Europe as countries seek to optimise renewable energy use and modernise their grids.

Is Belgium a good place to invest in battery storage?

Belgium is one of the most active and mature grid-scale energy storage markets in Europe, with diversified opportunities for monetising battery storage via flexibility markets and a supportive regulatory regime.

How will I4b benefit Belgian households?

Commenting on the project, Andre Autrand, CEO of I4B said: "It addresses fundamental challenges related to the security of the electricity supply, balancing the grid, renewable energy development and decarbonization – all of which will benefit Belgian households as well as the industry and economy in general."
