

## SolarInvert Energy Solutions

**Can you still use solar energy if  
you have tiles on the roof**

## Overview

---

So, can you install solar panels on a tile roof?

The short answer is yes—but it requires careful planning and the right installation technique to ensure your roof remains intact and your solar system lasts for decades. Should you add solar panels to your tile roof?

But you can further defray your energy costs—even potentially eliminating them—by adding solar panels to your tile roof. Beyond the initial cost of purchase and installation, you'll only be paying for electricity when your monthly energy consumption exceeds what can be captured by your solar panels.

Are solar roof tiles better than solar panels?

Solar roof tiles are much more discreet than solar panels, making them a more obvious choice for listed buildings or properties in conservation areas. 2. Cost Solar roof tiles are approximately double the price of solar panels.

Can solar panels damage a tile roof?

Future damage from vibrations: Even if tiles remain intact during installation, they can weaken over time. Wind moving between the solar panels and the racking system can create vibrations that cause tiles to crack down the road. Because of these risks, standard installation methods won't work for tile roofs—especially lightweight ones.

How do I install solar panels on a lightweight tile roof?

The best way to install solar panels on a lightweight tile roof is through a method called inset solar installation, also known as a “comp-out” installation. This technique removes the section of tile where the solar panels will be installed and replaces it with composite shingles before mounting the solar array.

Can solar panels be installed on lightweight tiles?

If installers attempt to mount solar panels directly onto lightweight tiles, several issues can arise: Tile breakage: Walking on or drilling through these tiles can cause cracks or breaks, which may lead to roof leaks and structural damage.

Do solar roof tiles save energy?

The installation of these tiles will generate electricity, saving you money on your fuel bills. A 4kW solar roof tile system could save you more than 50% of the household's annual energy costs, based on an electricity bill of £600 a year. A 1kW system, the smallest option, could provide a saving closer to 15%. \*2 How efficient are the tiles?
