

SolarInvert Energy Solutions

Congo Modern Photovoltaic Curtain Wall System

Overview

What is photovoltaic curtain wall?

Photovoltaic Curtain Wall generates energy in the building implementing solar control by filtering effect, avoiding infrared and UV irradiation to the interior.

Which solar cells are used in photovoltaic curtain wall?

At present, crystalline silicon solar cells and amorphous silicon solar cells are mainly used in photovoltaic curtain wall (roofing) systems. Photovoltaic glass modules have different color effects depending on the type of product used.

What are the physical properties of photovoltaic curtain wall (roof) system?

The physical properties of the photovoltaic curtain wall (roof) system mainly include wind pressure resistance, water tightness, air tightness, thermal performance, air sound insulation performance, in-plane deformation performance, seismic requirements, impact resistance performance, lighting performance, etc.

What are the advantages of amorphous silicon curtain wall?

Its advantages are high photoelectric conversion efficiency, small installation size, mature material production and technology. Amorphous silicon curtain wall is a building material combining amorphous silicon solar film cell (such as cuprous sulfide, cadmium sulfide, cadmium telluride, etc.) module array with the curtain wall.

Congo Modern Photovoltaic Curtain Wall System

Photovoltaic Solar Powered Glass Curtain Wall Building Modules ...

Photovoltaic curtain wall (roof) is a new type of building curtain wall (roof) that combines traditional curtain wall (roof) with photovoltaic effect (photoelectric principle).
