

SolarInvert Energy Solutions

Djibouti Solar Electricity System

Overview

The power station design has 25 megawatt capacity. It will also be fitted with a battery storage facility with capacity of 5 MWh. Its annual generation is calculated at 55 GWh. The power generated at this solar farm is expected to be sold directly to Electricité de Djibouti (EDD), the national electricity utility monopoly for 25 years after commercial commissioning. The (PPAs), governing the purchase and supply of power between the.

Scheduled for commissioning later this year, the \$35 million project—equipped with an additional 5 megawatt-hours of battery storage—is a cornerstone of Djibouti’s ambitious plan to reduce reliance on imported fossil fuels and transition toward sustainable energy sources.
