# East Africa pack battery processing factory

## Overview

---

What will Africa's battery manufacturing landscape look like in 2025?

Africa's battery manufacturing landscape in 2025 is rapidly evolving. While South Africa leads in innovation and scale, countries like Kenya, Nigeria, and Rwanda are growing hubs for battery assembly and hybrid systems. As the continent electrifies, these manufacturers are not just building batteries, they're powering opportunities.

Where are first battery batteries made in South Africa?

First Battery has four dedicated plants across South Africa to support their production, processing and recycling operations. The Automotive Battery Factory, located in Settlers Way, East London, is capable of producing over 10,000 batteries per day.

Which battery brand is most popular in East Africa?

6. Chloride Exide (Kenya) Chloride Exide is East Africa's most established battery brand. Though traditionally known for lead-acid batteries, they are expanding into lithium-ion and hybrid storage for rural and peri-urban energy needs.
