

SolarInvert Energy Solutions

Estonia s BESS wind power station

Overview

What is Estonia's Auvere Bess project?

Estonia's Auvere BESS project is designed to participate in both the electricity exchange and other energy markets to ensure the security of electricity supply. According to Eesti Energia board member Kristjan Kuhi, the battery is able to respond very effectively to fluctuations in the power system.

Where is Estonia's largest battery storage facility located?

The flagship battery storage project commenced operations on February 1, only days before cutting ties with the Russian power grid. Estonian state-owned energy company Eesti Energia has inaugurated the nation's largest battery energy storage facility at the Auvere industrial complex in Ida-Viru County.

How much wind power does Estonia have?

Total installed wind power was 149 MW at end of 2010 and grew to 303 MW in 2014 and 329 MW in 2016. Record production of wind parks is 279 MW in 2014. Estonia has target of 14% (1.5 TWh) and total renewable electricity 1.9 TWh (17.6%). According to the national Energy Action Plan (2020) planned shares are onshore 9% and offshore 5%.

What is Eesti Energia's Energy Plan?

'We are honoured to contribute to Eesti Energia's energy plan for desynchronisation (disconnecting from Russia's grid) in the Baltic countries,' said Kyuwon Heo, Head of Grid ESS Europe at LG Energy Solution. Estonia is targeting an exit from electricity production from shale gas and a 40% renewable energy mix by 2030.

How does Eesti Energia's battery work?

According to Eesti Energia board member Kristjan Kuhi, the battery is able to respond very effectively to fluctuations in the power system. "This modern

capacity significantly reduces the costs of balancing the Baltic electricity system and thus the end price for the consumer," Kuhi said.

Where is Bess located?

The complex is located close to the border with Russia in the northeast of Estonia. The procurement, launched in June last year, saw local firms Diotech OÜ and Solar Wheel OÜ win a joint tender with LG Energy Solution enlisted to supply the BESS units.
