

## SolarInvert Energy Solutions

# Ethiopia Photovoltaic Energy Storage Fire Fighting System

## Overview

---

What is battery energy storage fire prevention & mitigation?

In 2019, EPRI began the Battery Energy Storage Fire Prevention and Mitigation – Phase I research project, convened a group of experts, and conducted a series of energy storage site surveys and industry workshops to identify critical research and development (R&D) needs regarding battery safety.

Can firefighters work near energized PV systems?

As PV deployments have become commonplace around the world, codes and standards bodies have worked with the fire services and the PV industry to develop guidelines to address the potential hazards to firefighters working near energized PV systems.

How can a PV system improve firefighters' safety?

As main activities to improve firefighters' safety, the German guidelines explain the importance of recognizing PV systems, installation methods of DC wires to lower electric shock risks for firefighters, and a specific firefighting operation flow for fires involving PV systems.

When did fire safety standards for PV systems come into force?

The Tokyo Fire Department released “Directive standards for fire safety measurement regarding PV systems” to ensure the safety of firefighters in July 2014<sup>24</sup>. The scope includes buildings requiring fire prevention such as commercial buildings and public buildings in Tokyo. It went into force on October 1, 2014.

How to improve electrical safety of PV systems?

To improve the electrical safety of PV systems, guidance is given for system design, selection of system components, and an outline of operation and maintenance procedures on a site. The Tokyo Fire Department released “Directive standards for fire safety measurement regarding PV systems” to

ensure the safety of firefighters in July 201424.

Are photovoltaic systems dangerous to firefighters?

A joint industry study carried out in Germany (Fraunhofer ISE 2017) concluded that photovoltaic systems do not pose any special threat to firefighters, as long as the firefighters comply with the safety clearances. PV systems can be handled in the same way as any other electrically live equipment.
