

SolarInvert Energy Solutions

Ethiopia s wind power and energy storage industry

Overview

Does Ethiopia have wind power?

Ethiopia, a country that relies on hydroelectric plants for the bulk of its power, is now developing significant wind energy capacities.

Why is energy important in Ethiopia?

Energy is one of the most significant sectors for Ethiopia's economic growth and development and is expected to increase significantly in the medium run. Ethiopia has abundant renewable energy resources and has the potential to generate over 60,000 megawatts (MW) of electric power from hydroelectric, wind, solar, and geothermal sources.

How many wind farms are being built in Ethiopia?

With the aim of diversifying the energy sources, the Ethiopian government is constructing a number of wind farms with total capacity of $1116\,$ MW. It was mentioned that according to the growth and transformation plan adopted by the government for the period of 2011 to 2015, EEPCo has planned to build eight wind farms .

What is energy sector support in Ethiopia?

Energy sector support in Ethiopia aligns with Power Africa 2.0 objectives, which include advancing sustainable development through private sector led partnerships; promoting economic prosperity; and an increased focus on the enabling environment, transmission, and distribution. Technical assistance provided includes:

Is Ethiopia's power sector over dependant on hydropower?

The Ethiopian power sector is over dependant on hydropower. The country need to diversify its energy sector and keep looking for other energy sources such as wind, geothermal and solar because its extreme hydropower dependence may leave its power sector vulnerable to drought, an increasingly

risky scenario due to climate change.

How much energy is available in Ethiopia?

With the addition 52 MW from wind in December 2012, the current electric energy access of the country is around 50%. The Ethiopian government is devoted to improve its energy production capacity as quickly as possible by constructing new power plants and expanding the national grid.

Ethiopia s wind power and energy storage industry

Ethiopia: Wind farm starts to feed energy into national grid

A wind farm in Ethiopia has started feeding power into the country's grid and is expected to increase output when all its turbines come online by the end of the year.
