Spare lithium batteries (including power banks and charging cases) are now banned from checked luggage. All lithium batteries and battery-powered devices must be carried in your carry-on. Battery terminals must be protected from short circuit (tape, cases, or original packaging). Are lithium batteries allowed in checked luggage?

TSA and FAA have updated travel rules banning 7 lithium battery-powered items from checked luggage. Here's what you need to know before packing, [Travel News News - Times Now](#).

Can you take lithium batteries on a plane?

- FAA bans most lithium battery-powered items from checked luggage on all U.S. flights for safety reasons.
- Power banks, spare lithium batteries, and charging cases must stay in carry-on bags only.
- Business travelers need to pack all backup batteries and power sources in their cabin luggage to comply.

Can you carry lithium batteries in a carry-on bag?

Other items with lithium batteries that can only be in a carry-on bag include e-cigarettes and vape pens. As the FAA explained, lithium-ion batteries pose a fire risk in the cargo hold as they are capable of overheating and undergoing a process called thermal runaway.

What is a lithium battery?

Lithium Batteries → Rechargeable or disposable batteries used in phones, laptops, and portable chargers; sensitive to heat, damage, and short circuits.  
Checked Luggage → Bags given to airline staff at check-in and transported in the airplane's cargo hold, not accessible during flight.

Are lithium batteries dangerous?

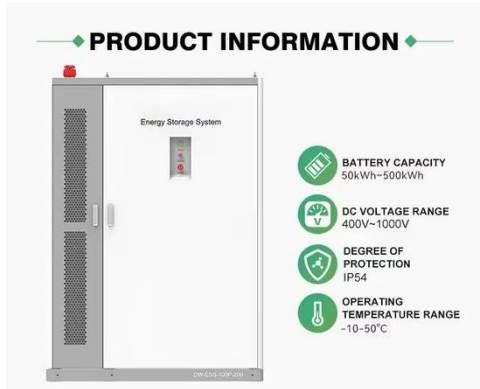

Lithium batteries power nearly all our favorite travel gadgets, but they can pose a serious safety risk if not handled properly. All lithium-ion batteries are

capable of overheating and entering a process called “thermal runaway,” which can lead to fires—especially dangerous in the cargo hold where they’re harder to contain.

Will lithium-ion batteries affect travel?

Almost all portable chargers and power banks use lithium-ion and lithium-metal batteries, meaning most travelers transporting the nifty holiday essential will be impacted. According to the new directive, lithium-ion and lithium-metal batteries, including power banks and cellphone battery charging cases, must be in carry-on baggage only.
