

## SolarInvert Energy Solutions

# India containerized photovoltaic energy storage system

## Overview

---

What is a containerized solar PV system?

Powtech's Containerized Solar PV Solution utilizes innovative hybrid technology housed within a standard 20-ft marine container, delivering up to 10,000 kWh of energy annually. The system integrates solar panels positioned atop the container, boasting a power capacity range of 4 to 8 kWp, complemented by a reliable battery backup system.

What is the self-sustainable containerised solar PV solution by STATCON Energiaa?

The brand new self-sustainable Containerized Solar PV Solution by Statcon Energiaa provides a ready-made alternative for the common problem of power supply to remote and far-flung areas. The containerised hybrid Solar PV solution can generate around 10,000 kWh/year.

Is energy storage a viable option in India?

However, the viability of the energy storage system ecosystem remains pegged to the capital cost of the BESS. As compared to the conventional sources of energy, solar PV when integrated with battery storage is a cost-competitive option. This trend is expected to continue in India.

Is solar PV a cost-competitive option in India?

As compared to the conventional sources of energy, solar PV when integrated with battery storage is a cost-competitive option. This trend is expected to continue in India. India's commitment to a sustainable energy future is evident through its multifaceted approach to battery energy storage.

How much does energy storage cost in India?

Overall, the levelised cost of energy storage is now INR 6-7 per kWh – a sharp decline from INR 8-9 per kWh in 2022. A report by the International Energy Agency (IEA) underscores a strong growth in the utility-scale battery storage

market, with solar PV modules and battery storage becoming the backbone of the country's power grid by 2050.

Which energy storage technology is included in India's national electricity plan?

Electrochemical energy storage technology, represented by Li-ion battery, is included in India's National Electricity Plan for 2022-2032. By the fiscal year of 2031-2032, electrochemical storage will surpass PSH, making it the dominant energy storage technology.
