

## SolarInvert Energy Solutions

# Inverter outputs in different power ranges

## Overview

---

Inverters can be classed according to their power output. The following information is not set in stone, but it gives you an idea of the classifications and general power ranges associated with them. These ranges may vary from one manufacturer to another. Inverters may also be found with output power.

Specifications provide the values of operating parameters for a given inverter. Common specifications are discussed below. Some or all of the specifications usually.

Determine the power that a solar module array must provide to achieve maximum power from the SPR-3300x inverter specified in the datasheet in Figure 1. Solution.
