Jordan s new energy storage

Overview

Will Jordan build a \$40 million battery facility?

Jordan's government has reportedly agreed on proposals for a \$40 million battery facility to push forward the country's energy storage ambitions. The government has signed a memorandum of understanding with 23 international firms and consortia to build a battery storage facility with a capacity of "at least" 30MW, according to The Jordan Times.

Does Jordan need a high-tech energy storage system?

Interviewed by The Jordan Times, officials and experts underlined the need to utilise high technology to store energy produced from renewables, be they solar or wind. Acknowledging that Jordan has achieved "tremendous" progress in the renewable energy sector, other experts called on the government to extend more incentives to businesses.

Does Jordan have a energy surplus?

AMMAN — Jordan has secured a pioneering status in renewables, yet it is still facing a major challenge: Energy surplus. Interviewed by The Jordan Times, officials and experts underlined the need to utilise high technology to store energy produced from renewables, be they solar or wind.

Which energy sources are most popular in Jordan?

Jordan's solar and wind energy have been the most prevalent, accounting for nearly 20 per cent of the country's electricity grid, according to the International Trade Administration's website.

How much electricity is generated by solar & wind power plants in Jordan?

Kharabsheh told the paper electricity generated by solar and wind power plants in Jordan as of the end of 2017 was around 500MW— a level he wants to increase to 2,700MW by 2021.

What are the conditions for solar energy in Jordan?

The conditions for solar energy are ideal in Jordan, where the average number of sunny days per year is 316, combined with large desert areas that are sparsely populated, the International Trade Administration's website said.
