

## SolarInvert Energy Solutions

# Kyrgyzstan Energy Agency Energy Storage Project

## Overview

---

How can I export data from Kyrgyzstan?

Data will be available through the .Stat Data Explorer, which also allows users to export data in Excel and CSV formats. Kyrgyzstan has considerable untapped renewable energy potential. Existing renewable energy consists of large HPPs, which account for 30% of total energy supply, but only 10% of hydropower potential has been developed.

How much CO2 does Kyrgyzstan produce?

higher than the global average. The Kyrgyzstan energy sector contributes to roughly 60%, 9.1 MT of CO<sub>2</sub>, of its total GHG emissions, where the residential energy consumption and the production of heat & electricity account for over 70.

Why is Kyrgyzstan's energy sector deteriorating?

in Kyrgyzstan. Deteriorating infrastructure The deterioration of energy sector infrastructure coupled with the financial crisis in the energy system will eventually lead either to a significant decrease in the quality of produ.

How much money did the Kyrgyz project cost?

The project was funded by the state, and the budget reportedly did not exceed KGS 2.5 million (about USD 36.6 thousand at the exchange rate of the National Bank of the Kyrgyz Republic as of 18 April 2017: USD 1 = KGS 68 2881).

Can non-recyclable waste be converted into electricity and heat in Kyrgyzstan?

Municipalities of large cities have been considering building plants for converting non-recyclable waste materials into electricity and heat, but no plans have yet been fully developed or implemented. Both energy supply and demand offer many opportunities for efficiency improvements in Kyrgyzstan.

Does Kyrgyzstan have solar energy?

Kyrgyzstan's geographic location and climatic conditions are quite favourable for the broader development of solar energy, evident in solar radiation maps.

## Kyrgyzstan Energy Agency Energy Storage Project

---

### Kyrgyzstan Compressed Air Energy Storage Project

The electro-mechanical energy storage project uses compressed air storage as its storage technology. The project was announced in 2013 and will be commissioned in 2020.
