

SolarInvert Energy Solutions

Mobile outdoor directional base station

Overview

What are omnidirectional base station antennas?

Omnidirectional base station antennas are collinear designs enclosed in a high density fiberglass, which is covered with a protective ultraviolet inhibiting coating. The radiating elements are made from high efficiency copper and are carefully phased to provide maximum gain in the horizontal plane.

How can a base station antenna be mounted?

Our base station antenna can be mounted horizontally or vertically. It is a top-performing omni-directional antenna, easily tunable with 2000 Watts PEP.

Where can I buy CB base station antennas?

You can buy CB base station antennas on Amazon.com.

Where can a CB base station be set up?

A CB base station can be set up inside a home, on a job site, or anywhere that requires a temporary base station. This base antenna is perfect for commercial CB applications that need high-power communications, as well as for a CB enthusiast or small business.

How high should a base station antenna be?

The best omni-directional base station antenna is currently the Solarcon Imax 2000 due to its improved dB gain and 24' height. However, the most commonly bought and used base antennas (including on our own building) are a tie between the Antron A99 and the Proton PT99 both of which are around 18 feet tall. How high should a CB base antenna be?

.
