

SolarInvert Energy Solutions

Myanmar promotes energy storage system transformation

Overview

Does Solis have an off-grid battery energy storage system in Myanmar?

Solar tech leader Solis is making waves in Southeast Asia with its new energy solution — an off-grid Battery Energy Storage System (BESS) in Myanmar.

Is Myanmar progressing in transport infrastructure?

Evidence of further progress in transport infrastructure in Myanmar is clear through the paved highway network, which increased by 35 percent. The country is developing at around 6 to 7 percent; however, according to the ADB, further investment in transport infrastructure is necessary to completely develop the transport sector.

Why is energy infrastructure important in Myanmar?

The limited availability of modern energy services and infrastructure has resulted in Myanmar having one of the lowest per capita energy consumption rates in the world. Developing energy sector infrastructure and increasing access to modern forms of energy for Myanmar's people are therefore of paramount importance for the country's economic growth.
