## **Palau New Energy Storage Base**

#### **Overview**

When did Palau launch its first solar and battery energy storage system?

Palau on June 3 launched its first solar and battery energy storage system (BESS) project on Friday. The project was made possible by Renewable company Alternergy Holdings Corp. and its subsidiary Solar Pacific Energy Corporation.

What is Palau's energy storage system?

energy storage system, was undertaken by Solar Pacific Pristine Power, a privately owned company. The plant will provide approximately 20 per cent of Palau's power needs, delivering up to 23,000 megawatt hours per year to the grid network, reducing Palau's reliance on expensive diesel generators.

Does Palau have a battery storage system?

As there is no battery storage system currently present in Palau, the panels can only generate throughout the day when the sun is available, and no electricity can be stored for later use. Furthermore, the figure also confirms that Palau's current power system is widely dominated by fossil fuel generation.

Does Palau have a renewable power system?

The results of the optimisation show that Palau's current power system is dominated by diesel generation, with renewable energy only taking a small share (just 4%). With more deployment, however, the share taken by renewables could potentially increase to more than 92%. This corresponds to the lowest average system LCOE.

How can Palau achieve a 100% share of renewables by 2050?

A key recommendation for the government, if it is to achieve its proposed target of a 100% share for renewables by 2050, is to accelerate deployment of solar PV and battery storage systems through a combination of Palau Public

Utilities Corporation (PPUC) investments and power purchase agreements (PPAs).

Will Palau achieve a fully decarbonised power system?

In conclusion, by following the recommendations outlined in this roadmap, the Republic of Palau will be on the road to achieving a fully decarbonised power system, based on solar and wind power for electricity and transport and supported by battery storage and green hydrogen. 1. INTRODUCTION TO THE PALAU ROADMAP 1.1. ROADMAP OBJECTIVE
