

## SolarInvert Energy Solutions

# Photovoltaic energy storage retail price

## Overview

---

How much does a PV system cost?

Our operations and maintenance (O&M) analysis breaks costs into various categories and provides total annualized O&M costs. The MSP results for PV systems (in units of 2022 real USD/kWdc/yr) are \$28.78 (residential), \$39.83 (community solar), and \$16.12 (utility-scale).

How much does a PV system cost in 2022?

The current MSP benchmarks for PV systems in 2022 real USD are \$28.78/kWdc/yr (residential), \$39.83/kWdc/yr (community solar), and \$16.12/kWdc/yr (utility-scale, single-axis tracking). For MMP, the current benchmarks are \$30.36/kWdc/yr (residential), \$40.51/kWdc/yr (community solar), and \$16.58/kWdc/yr (utility-scale, single-axis tracking).

How do solar companies help the photovoltaic industry?

Solar companies help the photovoltaic industry by maintaining and increasing the contribution made by existing solar systems to the electricity mix. They achieve this through repair, optimization, and maintenance services, which also confirm general confidence in the reliability of solar technology.

What makes a PV system a market price?

Market prices can include items such as smaller-market-share PV systems (e.g., those with premium efficiency panels), atypical system configurations due to site irregularities (e.g., additional land grading) or customer preferences (e.g., pest traps), and specific project requirements (e.g., unionized labor).

Is the European photovoltaics market recovering?

The European photovoltaics market has not yet lived up to expectations after the strong increase in installation figures in late 2016. Although there has been an overall revival compared to the first quarter of last year, the market

has still failed to really take off.

How much would a PV system cost without a 45x credit?

Without the 45X credit eligible for domestically assembled modules, inverters, and battery packs the MMP of the residential PV and PV-plus-storage system would have been \$2.90/Wdc and \$4.93/Wdc, respectively.
