Photovoltaic energy storage system revenue

Overview

How will the solar energy storage industry evolve?

As the solar energy storage industry evolves, there is a shift towards more advanced and higher-performing technologies and alternatives which is set to influence the industry outlook.

Can you finance a solar energy storage project?

Since the majority of solar projects currently under construction include a storage system, lenders in the project finance markets are willing to finance the construction and cashflows of an energy storage project. However, there are certain additional considerations in structuring a project finance transaction for an energy storage project.

Do investors underestimate the value of energy storage?

While energy storage is already being deployed to support grids across major power markets, new McKinsey analysis suggests investors often underestimate the value of energy storage in their business cases.

Is solar energy storage a future-proofing energy system?

The transition to renewable energy and the integration of energy storage are seen as key components of future-proofing energy systems and ensuring energy security. Governments and organizations continue to recognize the value and potential of solar energy storage for enabling a sustainable and resilient energy future.

How do I evaluate potential revenue streams from energy storage assets?

Evaluating potential revenue streams from flexible assets, such as energy storage systems, is not simple. Investors need to consider the various value pools available to a storage asset, including wholesale, grid services, and capacity markets, as well as the inherent volatility of the prices of each (see sidebar, "Glossary").

Are solar and wind projects a good investment?

These projects will have long-term predictable revenue streams. In addition, lenders may be willing to finance merchant cashflows, but with less leverage and subject to detailed market studies and cash sweeps. These trends for solar and wind projects also apply to energy storage projects.
