

SolarInvert Energy Solutions

Polish energy storage exports

Overview

The European Green Deal aims for a 55% reduction of greenhouse gas emissions by 2030 (compared to 1990 levels) and full climate neutrality by 2050. For the energy sector and the Polish economy.

Can Poland create a broad energy storage industry?

The new rules create an opportunity for Poland to create a broad energy storage industry, PSME's president said, from the development of technologies and products to the creation of jobs. In the main power market auction in 2022, battery energy storage was contracted for the first time - 165 MW to be exact.

Is a 2023 capacity auction a big step forward for Polish energy storage?

It looks to be a big step forward for the Polish energy storage market, which is already advancing into a leading position among Central and Eastern European markets, driven forward by a 2023 capacity market auction in which 1.7GW was awarded to energy storage bids.

Does Poland need a state aid package for energy storage?

A panel discussion on the Polish market at the recent Energy Storage Summit CEE in Warsaw. Image: Solar Media The European Commission (EC) has approved a €1.2 billion (US\$1.32 billion) state aid package for Poland to support the deployment of electricity storage facilities.

Did Poland stop importing coal from Russia in 2022?

Starting in May 2022, Poland stopped importing coal from Russia. According to Forum Energii estimates, anthracite consumption in 2022 amounted to about 66 million tons, down about 4 million tons (-5.9% y/y) from the previous year.

What is the Polish Hydrogen strategy?

The Polish Hydrogen Strategy specifies three key areas, that is industry, power generating sector and transport, six specific goals to be achieved and forty tasks which, when completed, will enable Poland to become a beneficiary

from the hydrogen technologies.

Is Poland generating more electricity in 2023?

Poland is also installing record levels of photovoltaic capacity as well, with wind and solar for the first time generating over a fifth (21%) of the country's electricity in 2023, up from 16% in 2022, based on figures from consultancy Ember.
