Precautions for installing battery cabinet

Overview

The battery cabinet contains an internal energy source. Hazardous voltage can be present even when the UPS system is disconnected from the utility/mains supply. Before installing or servicing the UPS system, ensure that the units are OFF and that utility/mains and batteries are disconnected. What are battery safety precautions?

lation procedures. Follow all battery safety precautions in 4.0 - Maintenance when installing, charging, or servicing batteries. In addition to the hazard of electric shock, gas produced by batteries can be explosive and sulfuric acid can.

What are the safety requirements related to batteries & Battery rooms?

Employers must consider exposure to these hazards when developing safe work practices and selecting personal protective equipment (PPE). That is where Article 320, Safety Requirements Related to Batteries and Battery Rooms comes in.

Do you need documentation before entering a battery room?

It is a requirement to have all the documentation in place prior to authorized personnel entering a battery room to perform a specific work task on a battery system under normal operating conditions. However, it is likely the employee will need to enter the battery room to deal with a battery system that is not operating normally.

Are battery storage systems dangerous?

There has been a fair amount of news about battery storage systems being involved in fire and explosion incidents around the world. Do not forget that these are not the only safety issues when dealing with batteries. Battery systems pose unique electrical safety hazards.

What are the risks of working with batteries?

Working around batteries can expose an employee to both electrical shock and arc flash hazards. A person's body might react to contact with dc voltage differently than from contact with ac voltage. Batteries can also expose employees to the hazards associated with the chemical electrolyte used in batteries.

What happens if you send an employee into a battery room?

Sending an employee who is trained only for the normal operating conditions into a battery room under thermal runaway, for example, is knowingly exposing an unqualified person to risk of injury. The employer is responsible for protecting their employees from known or recognized hazards in the workplace.
