Replacing the 80ah battery requires resetting the BMS

Overview

Do I need A BMS battery reset?

The Battery Management System (BMS) plays a crucial role in maintaining the health and functionality of your batteries. However, over time, issues can arise that require a reset. One common sign that indicates the need for a BMS battery reset is decreased battery performance.

When is a BMS reset necessary?

Resetting the BMS is only necessary when the system malfunctions or the battery isn't performing as usual. Resetting the BMS restores the system to its default settings, allowing it to make adjustments to battery performance according to the vehicle. The reset helps extend a car battery's lifespan by ensuring efficient power use.

How do I Reset my BMS?

Resetting the BMS usually involves the steps below. Disconnect any chargers or power sources to ensure nothing is actively charging the battery. Remove the battery from the vehicle and let it settle for thirty minutes to an hour to dissipate residual electricity. Press and hold the reset button on your battery to reboot the battery and the BMS.

Do non electric vehicles need a BMS reset?

Non-electric vehicles don't have complex battery management systems like those used on electric vehicles. However, newer non-EVs do have a basic system to manage the battery, so on a non-EV, a BMS reset might be necessary after a 12-volt battery replacement or a system malfunction.

How do I Reset my EV battery management system?

Resetting your EV's battery management system essentially involves retraining it to detect the upper and lower limits of its state of charge. How do I reset my BMS on my car?

The process may vary according to make and model, but the BMS reset procedure usually entails discharging the battery to single digits and recharging it completely.

Does an AGM battery have a BMS?

An AGM battery does not have a BMS, lithium batteries do. The only thing that may need a reset (and is not required on FCA vehicles) is the IBS. However simply unplugging the IBS from the battery DOES reset it and it will relearn itself over the course of a few days.
