

SolarInvert Energy Solutions

Resistance of outdoor power supply

Overview

Outdoor power strips are made to function in rain, dust, and damp environments. IP ratings such as IP44 or IP65 indicate the level of resistance the unit has against water and particles. These ratings come in handy when positioning power strips close to grass, concrete, or outdoor equipment.

Resistance of outdoor power supply

Indoor and Outdoor Power Strips: What You Need to Know?

For outdoor environments, durability is paramount. A power strip used outside must be designed to withstand exposure to water, dust, and temperature extremes. Look for ...
