Rooftop photovoltaic panels wind resistance

Overview

Generally, solar panels are highly resistant to damage from windy conditions. Most in the EnergySage panel database are rated to withstand significant pressure, specifically from wind (and hail!)

Rooftop photovoltaic panels wind resistance

Whether the panels are located in the edge zone, Blowing in

The timber roof members the solar panels are to be attached to also play a prominent role in the resistance to wind suction. If a product's wind resistance was assessed using larger section ...
