Securing Container PV Panels

Overview

So what do manufacturers do to ship panels without damaging them?

Usually, to transport solar panels, a pallet is used. Here is how a good company packs it:

- First panels go on the pallet bottoms up and the last one is placed front side up.
- Corner protectors and foam pads across the frame are added.
- Usually.

What solar panels fear is mechanical pressure. Improper handling or bad placement can cause microcracks in PV modules which immediately lower their power.

Let's say, you've purchased panels and decided to pick them up at one of our warehouses instead of ordering a delivery. You can simply take the panels or get.

Now that you've arrived home with your order, you might need to store the panels somewhere until the installation. If you choose to carry panels in your.
