

SolarInvert Energy Solutions

Senegal Energy Storage New Energy

Overview

The project has been touted by the developer as the first solar PV facility in the region to be combined with lithium-ion battery storage. Described as a first for West Africa, a solar PV installation with battery storage project dedicated to frequency regulation has been commissioned in Senegal. Does Senegal have a battery energy storage project?

The national electric utility of Senegal, Senelec, has signed a 20-year CCA with Infinity Power for a battery energy storage project.

Who produces energy in Senegal?

Energy is produced by private operators and sold to the Senelec energy corporation. According to a 2020 report by the International Energy Agency, Senegal had nearly 70% of the country connected to the national grid. Current government strategies for electrification include investments in off-grid solar and connection to the grid.

Why is energy important in Senegal?

The Ministry of Petroleum and Energy led by H.E. Minister Sophie Aissatou Gladima knows that energy is at the very heart of any economic development plan, and as such, it plays a crucial role in supporting H.E. President Macky Sall's Emerging Senegal Plan (PSE).

How much energy does Senegal have?

As of April 2020, the energy sector in Senegal has an installed capacity of 1431 megawatts (MW). Energy is produced by private operators and sold to the Senelec energy corporation. According to a 2020 report by the International Energy Agency, Senegal had nearly 70% of the country connected to the national grid.

Where is a Bess project being built in Senegal?

The BESS is to be built at the Tobène substation in Thies, Senegal. It will be

operated by Infinity Power's 158.7 MW wind farm in Senegal, Parc Eolien Taiba N'Diaye (PETN)
