

## SolarInvert Energy Solutions

# Serbia lithium iron phosphate battery pack

## Overview

---

What is the first lithium phosphate battery factory in Europe?

It is the first lithium iron phosphate (LFP) battery cell factory in Europe, it added. In Serbia's northernmost city of Subotica, a project is underway for a battery gigafactory with an annual capacity of 8 GWh, set for launch in 2026, while 40 GWh is planned to be added by end-2027.

Could Serbia be a technological leader in LFP battery production?

The Republic of Serbia could be a technological leader in LFP battery production in the whole world outside of China, because it has a chance to become the first in Europe to mass-produce this type of battery. The signed Memorandum with the European Union envisages a serious focus on the ecosystem of electric vehicles and battery production.

What is the first LFP battery cell facility in Europe?

s first LFP battery cell facility to supercharge electric vehicle production Subotica, Serbia, 24. April 2023 – Today, ElevenEs, the pioneer in LFP (Lithium Iron Phosphate) cathode battery technology, announces the opening of the first industrial facility dedicated to LFP battery cell production in Europe. ElevenEs, backed by EIT InnoEnerg.

What is a lithium iron phosphate (LFP) battery?

It is the first application of the lithium iron phosphate (LFP) technology in Europe, it stressed. The startup said its product, EDGE, is also the first cobalt and nickel-free battery cell on the continent and added the energy consumed in the process is 100% from renewable sources – a combination of hydro, wind and solar power.

What is the economic potential of a supply chain in Serbia?

The economic and market potential of this type of business model and supply chain in Serbia is enormous. We could expect about 10-12 billion euros of new

income for Serbia and about 20 thousand new jobs in our country, as well as a consequent serious growth and development of employees in the industry.

How long will lithium-ion batteries be used?

Lithium-ion batteries will be used for at least another 10, and most likely at least another 20 years. You are participating in the Look UP – Green Transition conference, where you will discuss the development of the value chain in Serbia with international and domestic experts.
