Overview

What is the quota on solar cells?

Anne is a seasoned writer, editor, and journalist. The administration of US President Joe Biden has issued a proclamation stating that the tariff rate quota of 14.25% on solar cells will remain, but the volume will increase from 5 GW to 12.5 GW.

Will the tariff quota on solar cells increase?

The administration of US President Joe Biden has issued a proclamation stating that the tariff rate quota of 14.25% on solar cells will remain, but the volume will increase from 5 GW to 12.5 GW. From pv magazine USA.

Does Biden impose tariffs on solar panels?

The Biden Administration has tweaked the Section 201 tariffs several times, and in several directions. The TRQ was bumped from 2.5 GW to 5 GW, and now to 12.5 GW. The Biden Administration is not against imposing tariffs, though, especially on solar modules. Imported solar panels also fall under Section 201 and are tariffed at 14.25%. No quota.

What does a new TRQ mean for solar?

The new measure, which increases the TRQ from 5 gigawatts (GW) to 12.5 GW annually, is aimed at supporting domestic solar manufacturers as they face increasing global competition. The change, set to take effect on August 1, 2024, will allow for a higher volume of CSPV cell imports without triggering additional safeguard tariffs.

Will bifacial solar panels be exempt from tariffs?

In his announcement, the President included an exemption for bifacial solar panels. This decision comes after the ITC recommended in November 2021 to extend the safeguard tariffs for an additional four years. Proclamations.

How will the CSPV tariff change affect solar panels?

The change, set to take effect on August 1, 2024, will allow for a higher volume of CSPV cell imports without triggering additional safeguard tariffs. This adjustment is expected to benefit U.S. solar module producers who currently depend on imported CSPV cells due to limited domestic production capabilities.
