How much solar power does Montenegro have?

Montenegro had installed solar power capacity of just 6 MW at the end of 2020. The country's solar power capacity is significantly smaller than the electrical power demand, which is currently met by the 225 MW Pljevlja thermal power plant in the north of Montenegro and two large hydropower plants, at Perućica (307 MW) and Piva (363 MW).

Where are solar power plants located in Montenegro?

Montenegro is rich in solar radiation, particularly in the southern part, especially around the cities of Bar and Ulcinj, and in the area around the capital city of Podgorica. Solar power plants are located in these areas due to the high solar radiation.

How much electricity is produced in Montenegro in 2021?

In 2021, Montenegro produced 3,160GWh of electricity. The majority of this electricity was produced at the Pljevlja coal-fired Thermal Power Plant as well as the Perucica and Piva Hydropower Plants.

How much does it cost to visit Montenegro?

The price is 2816 PHP (April 2023) and can be booked through Montenegro Ferry near the BPI bank. Book in advance as there are only 1-2 ferry schedules

each day. Port Barton is a coastal fishing town with nice beaches some 4-5h away by bus to the south of El Nido. It is less touristy but worthy of a visit to the pretty beaches.

How much does a solar auction cost?

The auction will accept bids for solar projects with a minimum capacity of 400 kW, offering up to 250 MW of total capacity. It is the first in a planned series of market premium auctions targeting 400 MW of new solar and wind capacity. The government has set a ceiling price of €65/MWh for the auction.
