# Supply in Ireland

## Overview

---

Domestic production accounted for €860 billion (66%), while €409 billion (32%) was made up of Imports. Exports made up €596 billion (46%) of the total amount of products used. Industries used €435 billion (34%) of total supply for further production (intermediate consumption). What is a place of supply outside Ireland?

in the absence of such place of business or a fixed establishment, the place where he or she has a permanent address or usual place of residence. There are certain specified services where the place of supply is outside Ireland if the customer is located outside the EU.

What can Irish enterprises do to strengthen supply chains?

There is immediate groundwork all Irish enterprises can do to improve operational performance and strengthen weakened supply chains. This will ease more significant changes to their supply chains in the coming months and years, which we will continue to provide insights across tax, strategy, operations and economics as a firm.

What is the supply and use for Ireland 2021?

The Central Statistics Office (CSO) has today (23 January 2025) published the Supply and Use for Ireland 2021. Commenting on the release, Becky Mangan, Statistician, said: “At a high level in the Supply Table, we saw a total of €1.3 trillion worth of products supplied in the Irish economy in 2021.

How are supply chain investments setting Ireland apart from other EU countries?

Supply chain investments are setting Ireland apart from competing countries in the EU due to the government supporting digital innovation through investments to enable a more digitised and interoperable manufacturing supply chain.

Is Ireland becoming a global hub for supply chain investment?

Ireland is fast becoming a global hub for supply chain investment. Picture: Getty Images Dr Chantelle McCann Kiernan from IDA Ireland says struggling companies must address business challenges by investing in supply chain improvements.

What challenges will Irish supply chains face in the next 12 months?

Over the next 12 months, Irish supply chains are expected to face several complex challenges. There is continued economic uncertainty, and fluctuating global markets are creating headwinds for businesses across various sectors.
