

## SolarInvert Energy Solutions

# The cost of one watt of lead-carbon energy storage

## Overview

---

Current lead carbon battery prices hover between \$150-\$300 per kWh. But wait—before you compare this to lithium-ion's \$400-\$800 range and start celebrating, there's a plot twist. Lead-carbon's real value shines in applications where cycle life and partial-state charging matter more than compact size.
