

## SolarInvert Energy Solutions

# Total investment in solar panel projects

## Overview

---

London, August 26, 2025 – Global investment in new renewable energy projects hit a record \$386 billion in the first half of 2025, up 10% from the previous year. How much does a solar project cost?

The project site covers about 10,000 acres of land, mainly pasture and cropland. The project is expected to start construction in 2024 and enter commercial operation in the first quarter of 2025. According to the 2022 Annual Technology Baseline (ATB), solar with co-located energy projects will cost \$1,540/kW.

How much solar power did the US solar industry install in 2024?

In 2024, the US solar industry installed nearly 50 gigawatts direct current (GWdc) of capacity, a 21% increase from 2023. This was the second consecutive year of record-breaking capacity. Solar accounted for 66% of all new electricity-generating capacity added to the US grid in 2024, as the industry continued experiencing record growth.

How much does a solar power plant cost?

The project is expected to have a maximum generating capacity of up to 800 MW of clean electricity. It will also include a Battery Energy Storage System (BESS) of up to 300 MW. The construction will start on January 1, 2024, with an estimated cost of \$1 billion.

How are the proposed measures affecting the solar sector?

The proposed measures have varying degrees of impact on each solar segment. We have identified some initiatives that are contributing to a challenging environment for the sector: Energy emergency declaration. President Trump declared an energy emergency, prioritizing thermal and hydropower generation over wind, solar and storage.

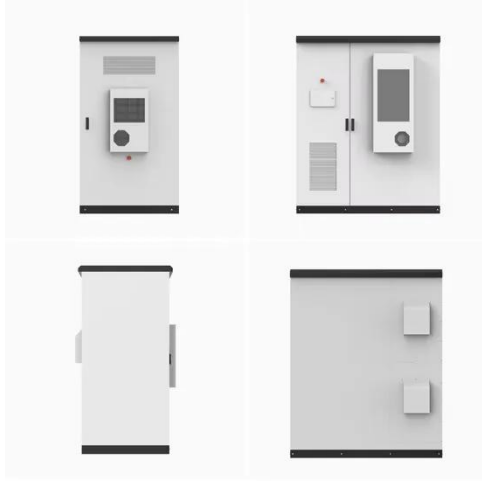

How will solar impact the energy industry?

The industry remains optimistic about the role of solar in achieving energy dominance and meeting rising electricity demand. State-level initiatives and corporate demand will gain more relevance and drive solar development, potentially mitigating the impact of federal mandates.

What is the average annual growth rate for solar PV?

We expect 8% average annual growth over the next five years. Commercial solar installations and Base case forecast, 2020-2029 3.3. Community solar PV
