

SolarInvert Energy Solutions

Tunisian energy storage power distributor

CE UN38.3 

Overview

What is the energy sector in Tunisia?

Revised in November 2024, this map provides a detailed view of the energy sector in Tunisia. The locations of power generation facilities that are operating, under construction or planned are shown by type - including gas and liquid fuels, natural gas, hybrid, hydroelectricity, solar (PV and CSP), wind and biomass/biogas.

Where does Tunisia's electricity come from?

Much of Tunisia's electricity production comes from gas turbines. Major players in this sector include General Electric (USA), Mitsubishi (Japan), Ansaldo (Italy), and Siemens (Germany). In 2019, STEG launched a tender to install a pilot smart grid power distribution system of 400,000 smart meters.

What percentage of Tunisia's electricity is renewable?

In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric, solar, and wind energy. While STEG continues to resist private investment in the sector, Parliament's 2015 energy law encourages IPPs in renewable energy technologies.

Does Tunisia have a power grid?

Tunisia's national grid is connected to those of Algeria and Libya which together helped supply about 12% of Tunisia's power consumption in the first half of 2023. Moreover, in August 2023, Tunisia's sub-sea connection project with Italy, called ELMED, was approved for \$337 million funding from the European Commission.

Does Tunisia have natural gas?

In addition to local gas production, Tunisia receives natural gas as a royalty on the Algerian Transmed gas pipeline crossing Tunisia to Italy. In 2022, only 3% of Tunisia's electricity is generated from renewables, including hydroelectric,

solar, and wind energy.

Who is TuNur Ltd?

TuNur Ltd is an independent renewable energy, transmission and green hydrogen developer at the epicentre of Europe and Africa TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components: 01. Generation 02. Transmission 03.

Tunisian energy storage power distributor

energy storage companies tunisia

As a global leader of smart energy solutions, Growatt provides residential, commercial and utility-scale PV inverters, energy storage, microgrid systems and smart energy management solutions.
