UK exports photovoltaic energy storage

Overview

Are solar power and battery storage powering the UK's economy?

Solar power and battery storage is powering up the UK's economy. The sectors are expected to almost triple their annual contribution to £5.1bn by 2035, while employing well over 40,000 people, says a new report. Around 20,000 people already work in the sector, providing £321m to the Exchequer, according to a new report by BiGGAR Economics.

How is the UK's solar energy and battery storage sector changing?

The UK's solar energy and battery storage sector is undergoing a rapid transformation, bolstered by ambitious climate targets and supportive policies. Solar photovoltaics (PV) capacity has rebounded since the end of feed-in tariffs, while energy storage is scaling up to enhance grid reliability.

How does solar and storage impact the UK economy?

Graeme Blackett, Managing Director of BiGGAR Economics, who led the research said: "This report highlights that as well as contributing to renewable energy targets, the solar and storage sector is having a substantial and growing impact on the UK economy.

Who develops UK energy storage projects?

Major developers of UK energy storage projects include EDF, Pivot Power, Statera, and RES, with each company active in several power supply and flexibility markets, providing services to National Grid, Distribution Network Operators (DNOs), as well as operating in the wholesale energy markets.

Is the UK's solar and energy storage sector at an inflection point?

In conclusion, the UK's solar and energy storage sector finds itself at an inflection point – bolstered by supportive policy, buoyant investment, and rapid tech improvements, yet challenged by infrastructure bottlenecks and the practicalities of an unprecedented build-out.

Are solar and battery storage Industries delivering economic benefits?

The solar and battery storage industries are delivering significant economic benefits across the UK. This report explores the substantial contribution these sectors make to job creation, economic growth, and energy security.
